

Care Monitor

Elder Care Quality and Safety Management System

The Most Comprehensive Quality and Safety Management System Developed in Ireland for Irish Nursing Homes

Care Monitor

Care Monitor has been developed by **Nursing Matters and Associates** in collaboration with **Brian O'Neill Consulting** who developed one of the first electronic care planning systems for residential care of older people in Ireland.

Evidence Based Assessment and Care Planning

- Streamlined process from initial contact
- Comprehensive screening assessment tool
- Triggered focused assessments
- Triggered risk assessments
- Care maps to guide care planning
- Sample care plans

Risk Management

- Resident specific risk assessment tools.
- Organisational risk assessment tools
- Risk register template
- Planned preventative maintenance schedules
- Incident reporting and analysis
- Complaints reporting and analysis
- Elder abuse reporting and investigation

Quality Monitoring

- Collection of key quality indicators
- Clinical governance action plans
- Clinical governance meetings

Daily Recording

- Events diary
- Full outlook style Resident's Diary
- Daily ADL touch-screen care record
- Analysis of data from daily recording
- Daily care and events linked to structured handover system

Human Resources

- Job description templates
- Interview template with marking matrix
- Recruitment checklist
- Training plan and matrix

Who Is Care Monitor?

Eithne Ni Dhomhnaill

Eithne has been involved in training people to assess and care plan since 1992. She set up Nursing Home Nursing Projects in 2006 and developed the first set of evidence based policies and procedures for nursing homes. She was on the HIQA Standards Group and wrote the guidance for the use of an MDS (minimum data set) tool for assessment and care planning. With Andrea O'Reilly she continues to provide training and consultancy in nursing homes throughout Ireland covering care planning, clinical governance and risk management.

Brian O'Neill

Brian has been designing and developing systems for assessment and care planning for the HSE and private nursing homes for the past 15 years. His system, Care Profile, developed in conjunction with Tanya Grandon was one of the first electronic care planning systems in Ireland. Care Monitor benefits from Brian's philosophy and experience developing user friendly, resident centred software.

Andrea O'Reilly

Andrea has been involved in assessment and care planning in her roles including: assistant director of nursing, practice development co-ordinator and nurse consultant with Nursing Matters. She provides training and consultancy in compliance with standards and regulations to both the public and private sector.

The Vision

At Care Monitor our vision is the creation of a resident centred system based on the best national and international standards..

We will continue to research best practice and develop Care Monitor to support achievement of same.

Our user group keeps us informed of their needs for an efficient and effective system.

The Care Monitor Package includes:

- Installation
- 2 day training in the use of Care Monitor
- Optional assessment and care planning training
- On-going support
- Updates in accordance with standards and legislation
- Advice and support in purchasing necessary hardware such as tablets, touch screens and laptops.
